## TECNOLOGIA - TECHNOLOGY

I rubinetti rappresentano un aspetto significativo dei consumi domestici, incidendo in modo rilevante sul bilancio energetico e idrico delle nostre abitazioni. In questo contesto, la nostra azienda ha adottato una filosofia di ricerca e innovazione, mirando a fornire soluzioni che consentano di correggere abitudini comuni e di limitare sprechi insostenibili.

Il nostro impegno si traduce in un sistema studiato attentamente: l'apertura dell'erogazione avviene tramite una leva posizionata centralmente, direttamente in acqua fredda, prescindendo dalla miscelazione con l'acqua calda. Questa scelta, oltre a garantire il massimo comfort, impedisce l'attivazione del sistema di riscaldamento, riducendo così significativamente il consumo energetico. Tale approccio riflette la nostra determinazione a promuovere pratiche sostenibili e responsabili, in linea con le più recenti direttive in materia di risparmio energetico.

Inoltre, per soddisfare particolari esigenze dei clienti o per rispettare le varie normative locali, i nostri miscelatori possono essere dotati di diversi modelli di limitatore di flusso che garantiscono la portata massima al minuto richiesta.

La nostra missione è promuovere un approccio consapevole all'uso delle risorse, garantendo al contempo la massima efficienza e comfort. Siamo fieri di offrire soluzioni che incarnano la nostra visione di un mondo più sostenibile ed efficiente.

The use of taps significantly affects household bills, heavily weighing on energy and water domestic consumption. For this reason our company has embraced a research and innovation oriented approach aimed at supplying efficient solutions, which can rectify everyday unsustainable habits and wastage.

Our commitment results in a new solution we engineered to supply water directly by means of a central lever on cold, thus bypassing any mixing with hot water. This choice, besides being user friendly, blocks the activation of the heating system, thus reducing energy use appreciably. This approach reflects our commitment to promoting sustainable and responsible practises in line with the most recent energy efficiency legislation.

Besides to meet specific requirements or simply comply with local legislation, our mixers can be fitted with different flow restrictors ensuring the required maximum flow rate per minute.

Our mission is to encourage a conscious approach to the use of resources, ensuring maximum efficiency and comfort at the same time. We are proud to provide solutions which incorporate our vision statement for a sustainable and efficient world.
